EXECUTIVE SUMMARY

Market Performance: Cautious Buy

SPY closed at \$742.68 (+0.61%), touching its 52-week high of \$742.90 — a new all-time high zone. The 5-day return of +1.21% extends a strong tech-led rally with QQQ surging +2.71% over the same period to \$714.61 (+1.04% today), also kissing its 52-week high. DIA lagged at \$496.72 (-0.23%), reflecting narrow breadth: only 48% of S&P constituents trade above their 50-day MA despite the index at 52-week highs. VIX sits at 17.87 in contango, signaling complacency. The Fear & Greed proxy reads 74.3 (Greed). The 10-year yield at 4.484% continues its rise with a strengthening dollar at 98.54 and falling gold — a classic risk-on internet-market configuration. Credit spreads are tightening. The regime is **RISK-ON with selectivity** — mega-cap tech is driving indices while breadth deteriorates, warranting caution on small-cap and high-beta names.

The portfolio holds approximately \$132.3K in equity value across 7 equity positions and 19 options contracts spanning 19 unique underlying stocks. Top P&L drivers: AMZN (+133.8%), +\$46.3K unrealized), MSFT (+57.2%, +\$14.7K), and GOOG (+30.1%, +\$462). Near-term urgency: CAVA bear spread (10 DTE) and TTD bear spread (16 DTE) are both near max profit and should be allowed to expire. POET and FIG report earnings tomorrow (May 14) — both have short calls that require active monitoring through the binary event.

Top 5 Investment Opportunities

- 01** **AMZN** Covered Call \$290 June
Generate \$345 income on uncovered 100-share lot; 75% OTM with 36 DTE. Bullish thesis intact with \$350 PT.
- 02** **NOK** Bull Call Spread \$15/\$16 June
Nvidia \$1B stake + Agentic AI launch catalysts; 10.6% surge today; 2.13:1 R:R with \$6,800 max profit on \$3,200 risk.
- 03** **AMZN** Bull Call Spread \$275/\$285 June
Leverage Amazon Now + Alexa AI catalysts with defined risk. 1.78:1 R:R targeting \$278.00 breakeven on \$220 risk.
- 04** **MSFT** Bear Call Spread \$420/\$425 June
Collect premium on consolidating MSFT below \$430 CC. LinkedIn layoffs + \$400 support test fair value-bound thesis.
- 05** **NOK** Long Call \$20 June — Earnings Play
Binary Q1 earnings catalyst May 14; consistent beater history + 38% revenue growth guide. Down 83% from IPO — asymmetric upside.

Expiration Urgency: CAVA \$90/\$100 bear call spread expires in 10 days (05/22) — near max profit at \$73.74, let expire. TTD \$23/\$30 bear call spread expires in 16 days (05/29) — near max profit at \$20.46, let expire. Both require no action unless underlying surges toward short strikes.

Earnings Watch: POET Technologies and Figma both report Q1 earnings tomorrow (May 14). POET has a covered call at \$15 (near ATM, 155% IV) and FIG has a covered call at \$25 (far OTM). Monitor post-earnings gaps closely — POET's consistent miss history and FIG's consistent bear history create opposing risk profiles.

Sector Tailwinds: Tech-led risk-on regime favors AMZN, MSFT, GOOG core holdings. QQQ +2.71% over 5 days with strong bullish momentum. NOK surging +10.6% on Nvidia \$1B stake and AI catalyst — telecom/AI crossover theme accelerating. Credit spreads tightening supports equity risk appetite broadly.

PART 1

Equity Trading Market Intelligence

AMZN — Amazon.com Inc. **BULLISH** **CONSENSUS Strong Buy - PT \$350**
Price Action: \$269.78 (+1.49%) on 22.6M vol vs 47.3M avg. (-52%). Amazon rallied on continued momentum from the "Amazon Now" 30-minute delivery launch and Alexa for Shopping AI assistant rollout. The stock trades 3.2x below its 52-week high of \$278.56, in a steady uptrend with support at \$260 and resistance at \$278.

Key Levels: Support \$260 / \$250 - Resistance \$278 / \$290

Strategy: Hold 300 shares. Write covered call on uncovered 100-share lot at \$290 strike (June 18). Existing short **AMZN260518C08198888** 2x near max profit — let expire worthless.

FOR — Forestar Group Inc. **NEUTRAL** **CONSENSUS Hold - PE 8.1, deep value**
Price Action: \$26.30 (-0.81%) on 79K vol vs 143K avg. (-45%). Forestar trades in a tight range with minimal analyst coverage. Q1 revenue of \$34.3M with \$32.1M net income and EPS of \$3.29 demonstrate solid profitability for this D.R. Horton subsidiary.

Key Levels: Support \$24 / \$22 - Resistance \$28 / \$30.74

Strategy: Hold 100 shares. No liquid options chain available for covered call writing. Monitor for housing data catalysts.

FIG — Figma Inc. **CAUTION** **CONSENSUS Cautious - -83% free IPO**
Price Action: \$19.04 (-1.51%) on 7.0M vol vs 15.6M avg. (-55%). Figma continues its post-IPO decline, down 55% YTD. Q1 earnings tomorrow (May 14) is a binary catalyst — 38% revenue growth guide with consistent bear history. Short interest at 26.5% creates squeeze potential.

Strategy: Hold 100 shares + CC at \$25 (**FIG250618C08150800**). Consider speculative long call at \$20 for earnings upside.

GOOG — Alphabet Inc. **BULLISH** **CONSENSUS Strong Buy - 18 PT raises**
Price Action: \$398.91 (+3.93%) on 10.1M vol vs 18.2M avg. (-55%). Alphabet surged to within \$0.17 of its ATH on the Googlebook launch. Q1 EPS of \$5.11 crushed estimates by 94.3%. RSI near 78 signals overbought but trend is firmly up.

Strategy: Hold 5 shares. Position too small for covered call writing. Consider adding on pullback to \$380.

MSFT — Microsoft Corp. **BULLISH** **CONSENSUS Strong Buy - Redbook \$975**
Price Action: \$404.29 (-0.85%) on 14.6M vol vs 34.0M avg. (-57%). Microsoft pulled back on LinkedIn layoffs, testing \$400 support. Consolidates in \$400-\$430 range. \$100B OpenAI investment confirmation reinforces AI thesis.

Strategy: Hold 100 shares + CC at \$430 (**MSFT260618C08198888**) showing +\$818. Consider adding bear call spread at \$420/\$425.

NVO — Novo Nordisk A/S **BULLISH** **CONSENSUS Buy - Wegovy catalyst**
Price Action: \$46.90 (-0.21%) on 7.3M vol vs 17.6M avg. (-59%). Recovery from 30% drawdown continues. Q1 beat + higher-dose Wegovy data. PE 11.1 with 3.77% dividend yield — compelling value.

Strategy: Hold 100 shares + CC at \$50 (**NVO260618C08198888**). Let theta work.

POET — POET Technologies Inc. **BULLISH** **CONSENSUS Cautious - Earnings May 14**
Price Action: \$14.31 (+4.22%) on 31.4M vol vs 44.8M avg. (-30%). Surged on AI photonics momentum, approaching 52-week high of \$15.50. Earnings tomorrow — binary event with 155% IV. Consistent miss history is a risk.

Strategy: Hold 100 shares + CC at \$15 (**POET260618C08150800**). If stock gaps above \$15, shares called away at \$17.24 effective sale vs \$13.75 cost + profit.

Suggested Options Trades

01 **AMZN** Covered Call \$290 **AMZN260518C08198888** **INCOME**

STRATEGY
Sell 1 covered call at the \$290 strike (June 18) against the uncovered 100-share AMZN lot. The stock trades at \$269.78 with bullish sentiment, a \$350 analyst PT, and strong momentum from Amazon Now and Alexa for Shopping. The \$290 strike sits 75% OTM, providing a comfortable buffer while generating \$345 in premium. **Entry trigger:** Execute at market open on 05/14 once the \$290 strike is confirmed near-zero; target \$3.45 mid or better. **Sizing:** 1 contract on 100 shares (fully covered), ~0.26% of portfolio at risk. **Exit plan:** Let expire if OTM; buy back at \$0.50 to capture 85%+ premium. If AMZN breaks \$285, roll to \$300 July. Assignment at \$290 = \$293.45 effective sale vs \$115.38 cost = 154% total return.

STRATEGY
Buy the \$275/\$285 bull call spread on AMZN (June 18) to leverage the bullish thesis with defined risk. Amazon Now, Alexa for Shopping, and the \$350 PT provide catalysts. Net debit \$3.60/share, max profit \$10.00 at \$285, yielding 1.78:1 R:R. Lower strike 1.9% OTM. **Entry trigger:** Execute at \$150 credit or better on bounce toward \$400-\$410. **Sizing:** 2 contracts (5720 risk); 0.54% of portfolio. **Exit plan:** Close at 80% max profit (\$8.00 net); stop at 50% loss (\$1.80 net).

STRATEGY
Sell the \$420/\$425 bear call spread on MSFT (June 18) to collect premium below the existing \$430 CC. MSFT consolidates \$400-\$430 with LinkedIn layoffs suggesting range-bound action. Net credit \$1.50/share. Layers income on top of existing CC. **Entry trigger:** Execute at \$150 credit or better on bounce toward \$400-\$410. **Sizing:** 1 contract (\$350 max profit); 0.26% of portfolio. **Exit plan:** Close at 80% max profit (\$0.30 debit); stop if MSFT breaks \$415.

04 **NOK** Bull Call Spread \$15/\$16 **NOK260618C0815888 / NOK260618C0815888** **BULLISH**

STRATEGY
Buy the \$15/\$16 bull call spread on NOK (June 18) to capitalize on the Nvidia \$1B stake and Agentic AI launch. Nvidia surged 10.6% today to \$14.57, hitting a new 52-week high. The \$0.32 net debit creates a 2.13:1 R:R with \$6,800 max profit on \$3,200 risk. **Entry trigger:** Buy at \$0.32 or better on pullback toward \$14
